

## CLAIMS:

We claim:

1. a method of combining the playing of a card game and the playing of a game similar to a keno game comprising:
  - a) a separate wager made on the poker game;
  - b) a separate wager made on the card keno game;
  - c) providing the means for the player to select and mark up to five cards from a displayed field of the entire deck of cards used in the poker game
  - d) dealing five cards out for the poker game
  - e) awarding credits on the card keno game according to a pre-established pay table based on the amount wagered, the number of cards marked, and the number of cards that were actually dealt out.
2. The method of playing a poker and card keno game according to claim 1 wherein the player may make a wager on which cards will be dealt in the draw portion of the poker game comprising:
  - a). the player selecting the cards to be discarded in the poker game;
  - b) the player making a wager on the card keno game;
  - c) the player selecting from the displayed field of cards the card or cards predicted to replace the discards;
  - d) awarding credits according to a pre-established pay table if the player has accurately predicted the card or cards dealt out to replace the discard or discards.
3. The method of playing a poker game according to claim 1 wherein said poker game is five card draw in which winnings are based on poker hand rankings and set forth in a pre-established pay table..
